Volume 1

24th September, NSS Day

- For any COVID 19 related queries, call your State Helpline/Ministry of Health & Family Welfare's 24/7 helpline at 1075 or 011-23978046.
- If you have mild symptoms and are otherwise healthy, self-isolate and contact your medical provider or a COVID-19 information line for advice. Seek medical care if you have a fever, a cough, and difficulty breathing. Call in advance.

Created to Create

On behalf of our team, we here achieved a good name and MEMPHERS would like to fame through past times. NSS have share our journey through always wished and walked under recent times. In this magazine, we have showcased our efforts towards the shade of the community thought improvising the art and literature NOT ME BUT YOU. As a society, around us. We have extended our works in every platform for the betterment of our society and its people under the supervision of NIST along with Berhampur University, who has always been supporting us and our work. We wish our work will bring much goodwill to our society and people.

NSS right from its beginning at NIST, has gained lots of importance for its workability as there always have been a group of students who have desire for making the society a better place to live in. This ability of the team has brought it to the extreme level of goodness. The team

It's with profound pleasure, humility and anticipation that we celebrate the launch of PARIKRANTI, *Volume 1*. Wishing you a happy reading time.

Mr. Anil Bishi
Associate Professor
Department of English
NIST
Faculty Guide
Parikranti 2020

Heartful Thanks,

Initially, thanks to the program officer of NSS, NIST Dr. Rajendra Ku. Khadanga for supporting while the work was in progress next to this administration of NIST; contributors whose interest is always our motivation, we are thankful to you.

Parikranti, the magazine series of NSS, NIST under the guidance of Mr. Anil Bishi took its strength, with the efforts of the MEMPHERS shape of the magazine was made, with the team spirit, the work became a long time remembering, wishing our work mark uplift in your services to the development of our society. TEAM NSS NIST feels pleasure in engaging with its readers. May Parikranti every year strengthen the bond we share.

Social Movers

A society of young and ignited minds for better living of people around

Since 4th August, 2013 team has worked constantly towards making areas of Palur, Chikiti, and other areas of Berhampur to render services with zeal

4

HIGHLIGHTS

PRESENT

6 • PANDEMIC STRAINS, LOWERING DEATH RATE

Atmosphere likely to see change, with life of people curving new ways to deal with the situation. Support is the need of the time, cooperation is the only way.

7 • VOCATIONAL STUDIES IN SCHOOLS

34 years of educational system changes, efforts for making system more global in standards is the main point of focus as union cabinet makes arrangements to implement the system with challenging times from September 2020.

Pg. 9

Joy of Giving - Aug 2019, Naba Jiban Ashram

Donation drive for children at ashram which included books, stationary and daily usage items

ON COURTS

8 • MAKING BONDS

HEALTY RED

Drive for collecting blood to make it for the peak needy to get it at though times. Drive connects students with pure social service. Marked as every academic year happening event.

9 • AWARENESS FOR SAFE LIVING

Awareness regarding the prime needs of society relating to road safety, women safety, and addiction; this also involved safety tips and ways of how addiction can be avoided, along with students studying in the campus, our faculties too took part.

Pg. 10

Pg. 11

Waterside area clean-up program

Special Camp, Palur

5

OFF COURTS

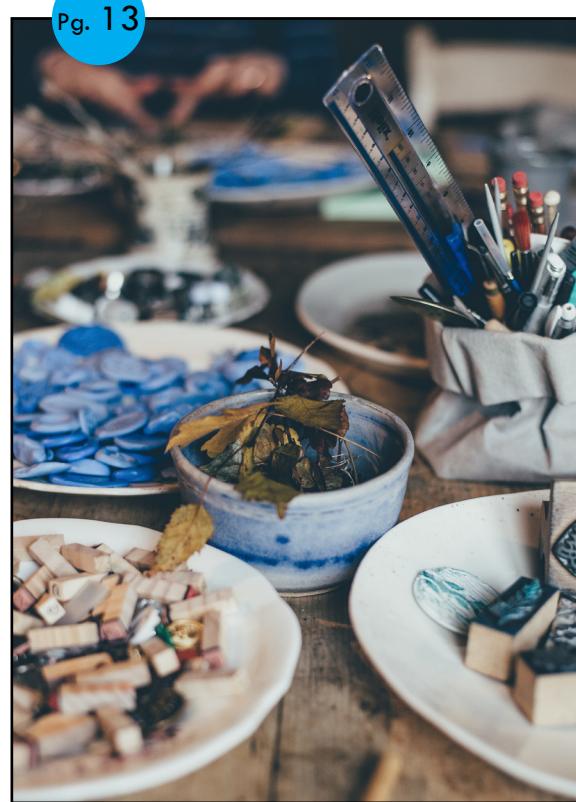

10 • AFFECTION

JOINING GENERATIONS

Society today understands the need of the best experienced people of worldly life, making their stay more comfortable and join bonds of affection was aim of our visit

11 • NOURISING CORE INDIAN SOCIETY

Week dedicated to understand and help in nourishing our rural part of the society, with making note of their needs and habitats one can see the phase of a society.

Pg. 13

FUTURE PLANS

12 • MAKING LIFE GOOD WITH KNOWLEDGE

Bridging bond between those who aren't educated and those educated. This will not only improve life of people but also strengthen their thoughts of making their children educated.

13 • RAISING FUNDS THROUGH CRAFT

Funds are the main element of a non profit serving society. Crafts will be our medium of generating funds that will be used for rural area service with focus in Palur.

TATA Nexon, TATA Tigor and MG ZS presently EVs in INDIA to have rise in markets, with +ve demand

NEW NORMAL

Pandemic Strains, Lowering Death Rate

Various sample vaccines and drugs are under human trails
goverment still trying to find the new mutant strains in the region

6

India under the effect of COVID 19 disease by the coronavirus clade A2a, A3i which are the strains of SARS-CoV-2 (RNA Virus) is under quarantine for more than 160 days which though kept the disease away from spreading at the community level but still situation blinks red, as there can be a worst-case if precautions not taken into consideration with the virus spreading through physical contact and nearness within 1-meter range of the infected makes it the cause of concern as the testing of the disease is moderate at level with zones likely to get contaminated are inspected by PPE covered area medical volunteers along with local

assisting medically trained men to get an exact data of people who are affected by the virus, alongside they take note of people who are likely to get affected by the infectious coronavirus, so it is the need of peoples' cooperation and helpful gesture for the health looking administrative authorities to carry their work productively towards making us safe and secured.

On Global view study and research is carried out at medical, pharmaceutical, and research centers for vaccine and

medicinal components that can reduce and irradicate the virus from affecting us. A vaccine is the need of the present situation as the virus having a cloned protein enters easily inside our body without any resistive response by our body. This easy go through makes it difficult to find what can make our body produce an immune effect to fight and destroy the disease-causing coronavirus strains in our body.

Around 25M+ people have reported as infected to coronavirus, 850K+ people deceased till date, making the situation more changeling for medical researchers, the development and endpoint supplement may take a while, as a new

medicine or vaccine to be available to the general public goes through channels of tests which analysis its effects and affects on the human body, along with these medical test it has to go through many market fulfilments so that the channel is clear and monitored legally, with many research going on its way it is

**DRDO's
new mobile
testing lab
can test 1000
sample per
day
Set-up highly
equipped**

clear that medical development will see at a hike rate in the coming, not so far futures, where the governments will invest more on their medical infrastructure and research as compared to the present day where their not so adequate medical aid available at emergency level; This pandemic situation saw a high need for Hydroxychloroquine, which mainly used for malaria treatment or body immunizer for a similar parasitic virus is now even used for primary or temporary cure.

A disease which has imprints of its origin back to 2012 where a group of people was affected showing pneumonia symptoms, which was caused by O type of SARS-CoV-1, there are even some incidents bearing claims that this had earlier attacked the humans

even in 2003 where some lost their lives, but with less or no much awareness and studies, it wasn't under global knowledge. Research says that this is caused by a laboratory experiment that involved animal cell study and was done for bioresearch involving bats mainly.

The disease spreading clad A2a, A3i of coronavirus is mild in effect and has spread over many countries including the Regions of India, Pakistan, Srilanka and recently Nepal too witnessed cases of COVID-19, with few traces of newer strains it is hard to say how many different types of SARS-CoV-2 are prevailing around us; However new strains of coronavirus (novel coronavirus) is spreading across many eastern places of Asia, thereby leaving country lockdown as the

only option, with over 216 countries under impact world is looking towards a new normal-environment;

CSIR along with ICMR, DBT, NIV, and a few other medical research institutes and labs have come forward to develop a vaccine for the pandemic disease. As an outcome, over ten samples of vaccines and few immunity boosters have come out with high success rates. As the search for a vaccine is the need of the world today, many countries like the USA, China-Saudi Arab, Russia, and with few national medical institutes of many other countries have led hopes to raise high for us.

EDUCATION POLICY

Vocational Studies in Schools

Impairment no restriction for learning, provisions to support

On July 29th, Educational Policy 2020 was launched by Union Ministers for Information and Broadcasting (IMB) Prakash Javadekar and Human Resource Development (HRD) Ramesh Pokhriyal Nishank; making additions to present provisions and standardizing Indian Sign Language across the country for education.

The policy depicts the education system to be more of career-focused, with the vocational course coming into effect students can opt skills like carpentry, electric work metalwork, gardening, pottery making, etc. to enhance their knowledge; These options are put forwards to students based on states decision of choice, it is likely to see that this new

system of dividing present class grade into 5 years of fundamental education which involves three years of preschooling (Balvatika) and two years of class one and two, next is 3 years of preparatory education from three to five which would mark a student as prepared for the middle level of 3 years which would enhance their skills of coding and other global required skills, following this there are 4 years of secondary education which would help students in developing their interest in desired skills, providing a self-assessment which would help them in building a strong career; which would resulting give better results and mark a milestone in the education system of the nation. National Bank of Credits will look over the transfer of credits to the middle exit making students, making the system more workable and easy to overcome inevitable situations.

NUKKAD - AARAKHSHAN

TEAM NSS NIST

Nukkad on Reservation by the Team to tackle the outraging problems of the society, which have been degrading the quality of today's education and society.

BLOOD DONATION DRIVE

Making Bonds Healthy Red

Organizing blood donation since 2015, participation over 200
Was prized as the highest number of blood donating unit

8

Donating blood is regarded as the best thing one can do as it not only saves a life but also strengthens bonds of humanity which bind us together, to this the spirit of people donating and those spreading benefits and promoting blood donation are to be appreciated, unlike other social work blood donation is the way making lives and saving them at needful situations; lastly, on the 18th of January 2020, we organized a drive at NIST Campus with ISTE NIST, AAMA ODISHA, and HDFC Bank. The event was inaugurated by Dr. Sangram Mudali in the presence of Dr. Rajendra Kumar Khadanga(NSS Program Officer),

Dr. Premeshwar Rao, Dr. Ajit Panda, Dr. Mihir Hota, Mr. Vinay Das. The drive had good facilities for the donors and so was the result as many of the students, faculties, NIST employees, and few other local people to campus also took part in the event.

It's a still going journey with many selfless social volunteers joining us through our way and goal of seeing a safe and healthy society. We heartfully thank every individual for their commitments and congratulate them for their good works which have stabilized the medical situations and urgent needs of the people of our society. With every donation there forms a bond indetachable.

Nukkad - Aarakshan

A live play on grounds on NIST Campus is the one which has now become a tradition of spreading ideas and showcasing the face of our present-day society. The topics of performance are chosen from real-life events and penned by our skilled writers, which even include students interested in social writings and have the zeal to work for the betterment of society. Today our nukkads have gained acknowledgment even on social media with high engagements.

Navodayh

Literature and art are the best forms of expression and they are even regarded as the reflectors in the case of society theme-based works. Every year we come with new social topics that are presented before students to participate and win. Like Indipedia, Navodayh have gained a special place in the minds of students and is always seen with new art and literature works.

Awareness For Safe Living

Tips and ways how society can have a better shaped youth

Among growing age, it is seen that with time comes situations that are to be self-monitored and brought under awareness. The three main issues which prevail in our society still degrading the life of many and requires a global walk together for the solution are 'Self Safty, Addiction, road safety' as these have numerous times proved as the affecting elements of society.

Understanding this we had a mass talk on the issues and with this, we also made them aware of the problems faced by youngsters in the past and shared views on ways how can we solve this bubbling degradable truth. This interaction brought in common many other similar issues that many young students were facing we discussed for a while regarding possible solutions and made them assured of the help in these issues with utter confidentiality.

Tips for self-defense for the girls at times of unknown or inevitable situations, ways how we can be safer while driving, and overcoming situations of addiction were our main focus. we aimed at making

the drive a more conversation like based on experiences if any and ways how they can be handled. To this, we even extolled information for various other help options, that can be helpful to the students of our institution.

Our focus was also on making people aware of the silent attacking psychological issues like depression and weak mindset and gave together some possibly solving tips and laid down the measures on how to stay away from these, we made them feel comfortably open to speaking talking about these issues, as it is a well-known fact 'Younger Generation Adds To Development Of Nation' so making them strong and fit to overcome any danger and the alarming situation is the need of the time.

We believe not only should the younger ones but also every individual of the society must be strong enough to tackle these situations as it's we who need to start our self-protection against these elements of our society as with safty comes secureness and this should start from self.

Knowledge regarding our nation, its moments of struggle, its birth, its culture, its people, and all above its diversification is a duty of every nation's citizen and in this regard is INDEPEDIA, which is a basic knowledge-making quiz organized by TEAM NSS and Quizzard of NIST together this has many engagements under its name with being one of the most participated events is also a fundraiser which is donated and brought to fulfilling social needs of needy making it a noble cause event happened on the day of Independence Day/Republic Day.

9

Joy of Giving

Giving is the way to get and if one can make it a cause of someone's smile than it means that success towards society being the best place to live in can be fulfilled. With this being our aim we started our event which targeted providing children with adequate essentials. A 3-day drive for collections of offering from desired donators to donating it personally along with people who wish to join us.

We will stay at home | Corona (COVID-19) Awareness

TEAM NSS NIST

As accountable citizens of India it's our duty to abide by the rules set by our government and spread awareness , to fight against this pandemic.

CHRISTMAS CELEBRATION

Affection Joining Generations

Spending time and learning things through ways of experience and passing of knowledge

10

A day of joy and moments of cherish is the day of Christmas and to us, this day has a meaning; this is the day when we meet our societies that group of people who are to be loved and taken care, we see them as our parents and at times they are even like our grandparents too. So special is our meet that many of our college mates to join us in this way of connecting and sharing the love.

We visit this parental home also referred to as Old Age Home on Christmas day at times we celebrate this day with the children who give us a feeling of being brothers and sisters to many siblings born from different mothers. We have been

celebrating this way not only because we care for them but also to make the day special with our meet.

Places of stay here for aged and children are not always adequate for the basic needs and requirements for living changes with change in time so it's necessary that we share some essentials and so we take with us things that could help them in living life better. We heartfully appreciate every individual who takes care of them, helps them in living with at least minimal adequates. It's our urge to every individual of the society to adopt with love at least one among them for it's our global religion 'Humanity'.

Plantation Drive

Plants are the life carriers which are needed part of the life cycle sustaining; we took a small initial step towards making our environment more clean and green so we planted mango saplings in and around areas of our Campus, to make this a regular practice we took a step forward by watering and taking care of the saplings by self and at the same time keep places of plantation clean. In addition to this, we had drive participation along with S.M. Public School.

Cleanliness Drive

'A go green and stay clean' supportive work along with many other like-wise organizations which included students from NIST, Way You Want Foundation, HHNT, RHA Berhampur, and MKCG Volunteers took place which witnesses the will of students towards making our seaside areas clean. This way of making our surroundings better than yesterday is the best way one can put effort into making water bodies clean.

SPECIAL CAMP

Nourishing Core Indian Society

Making attempt toward building strong and healthy society

A 7-day yearly camp under the supervision of Berhampur university took place during the Dusshera holidays for catering and understanding the face of rural in our living surroundings, this camp was for volunteers to better understand the situations and accordingly plan for the solution and help the village of Palur and Bishwanathpur mainly for improving lives of people living there. This camp not only brought-in interest of volunteers but also of many of our social work interested mates who came along helped in serving people and in-return were blessed with love and goodwill by the people of the village.

Initially, the first day was for surveying and building interactive bonds with people of the area. The survey jotted down several common issues of people, so we decided to solve them as far as possible, and so the next day was for bringing-in people together to think regarding 'Plastic Free Village' which was equally participated by the village representatives and people living

there, this effort took its shape from the very point of time as the villagers showed their positiveness regarding the issue; the next day(third day) emphasized on food provided to children and aged(mainly) in the area, discussed regarding nutrients and several other important points on food. The fourth day we walked for awareness on road safety, to this people connected very well; the next day(fifth day) we took a step towards making people aware of their health and importance of Yoga and Cleanliness by organizing a session at a community maintained area and followed the norm of FIT INDIA along with a plogging run for promoting Swachh Bharat Abhiyan; the sixth day was dedicated for the school children, where-in we had some interactive art and craft-making session along with distribution of stationery items, the next and the closing day of the camp we brought in a mini drive of distributing sanitary pads to the women and girls of the area. This way we had our 2019s camp, where-in problem solving based service was our main motive.

Poshan Abhiyan

A mission that was launched by Honourable Prime Minister Narendra Modi in March 2018 is a multi-ministerial convergence mission with the vision to ensure the attainment of 'Malnutrition Free INDIA'. In making this happen we made our efforts towards providing at least one-time meal for a day to those who are not able to make a proper nutritious meal even for a day, we made arrangements for giving away packets of food (essential nutritious) at the places like Annapurna Market, Bijipur Chawk, and few other places of Berhampur.

11

National Unity Day

A day to be remembered in the respect of Sardar Vallabhbhai Patel who stands as the symbol of unity. On October 31st we pledge towards making society a better place to live in; we visit and interact with people of surrounding rural area, regarding social issues, their experience sharing moments are the best captivating moments and things and area where we can foster and render our help and works. Overall this day marks as the time when we group up ideas for the future and coming times towards service.

TEACH SOCIETY

Making Life Good With Knowledge

Arranging for interaction and teaching classes for the school missed showing face of education in present society

12 Education is a vital role player in making life meaningful and developing by nature. The importance of education is high when it comes to the development of society, nation, or global on whole education is the key element that binds together people from varying cultures. The present-day situation is the result of a long struggle that was faced by young people of the 1970s who were less educated but had the zeal to work with knowledge bearers, so came the urging need of educating children right from the age of 4, with a glimpse of struggles in their life, education became the need of time.

Many places in Berhampur have an age group of 40-50, who are uneducated and face a lot of problem in their day to day life so we are taking preparatory steps towards making a schedule for interaction with people of couldn't reach school age groups, and making necessary arrangements for teaching them basic life-supporting educational context studies which include English, Hindi, Basic mathematics and make them aware of the government programs into existence and explain to them how the programs of government will help them developing and prospering in life.

*A CBFL program by TCS in Bhagatpur back in 2016
A event motivated by TCS is the future plan*

With the governments of nations understanding the need for a proper education, various facilities have been started for the betterment of the nation's people. Children are getting education through schools facilitating for their studies and the working and never gone school working house elders its night schools that the government has started through various missions and programs.

Education is the way one can develop skills like understanding modern-day works, coping with the advancements society is making, followed by better understanding the differences between what

can be done for the betterment of people here and what modernization means in real sense.

We on our visit made a few rough points of their needs and struggles for understanding and ability to write in official languages, this is triggering as they often fail to understand even government schemes and policies which are laid to benefit them but due to these of their no acknowledgment, they often lose the benefit opportunities.

An educated society is the best self-developing society. As in the present day, we can see that there are many issues

related to education though minor in number still has adverse effects.

We on negotiation with the village heads and talks with people facing this issue, we sketched out ways of making educational sessions for the ones who need it, we would always be happy to engage with people and try making the society a better one, better from today, a society

that would start treating education as not only the medium of development but also as the base of life.

A way developing society starts from its peoples' development and so we will make this happen by making them educated and self-developed as this would lead their next generations to better understand the need of being educated and

shorten the gap of rural areas development with that to any other areas.

Assistance from the government will reach people through education and if the society comes forward they can make it happen - 'society with a high literacy rate'.

FUND RAISING

Rising Funds Through Crafts

Helping to grow with skill learning opportunities

Our India is regarded as an enriched society in art through various of its forms and diversification, with this note a solution to the problem of un-ability to help in the economical growth can be solved as the government has put forward many programs where-in one can start craft-based small scale startups. With the passage of time, people have missed the art of learning our craftworks. Which indeed is the most flourished forms of work that prevailed in the past.

A way building-self starts with self, and so the effort towards being skilled; as we are aware that there is a provision based program by the government that deals and help in setting up, and promote the small scale industries and was intended to start even with those school missed but with zeal and motive to be part of earning society, the way from making them skilled to training them on the base of maintaining a small scale work is our aim.

Building a skilled society is a dream that will someday come to life with its base set, just requires a push and a training system to complete the situation. As of places in Berhampur, it is the need of younger generations to come forward and

make it possible and clear towards making skill the base of life.

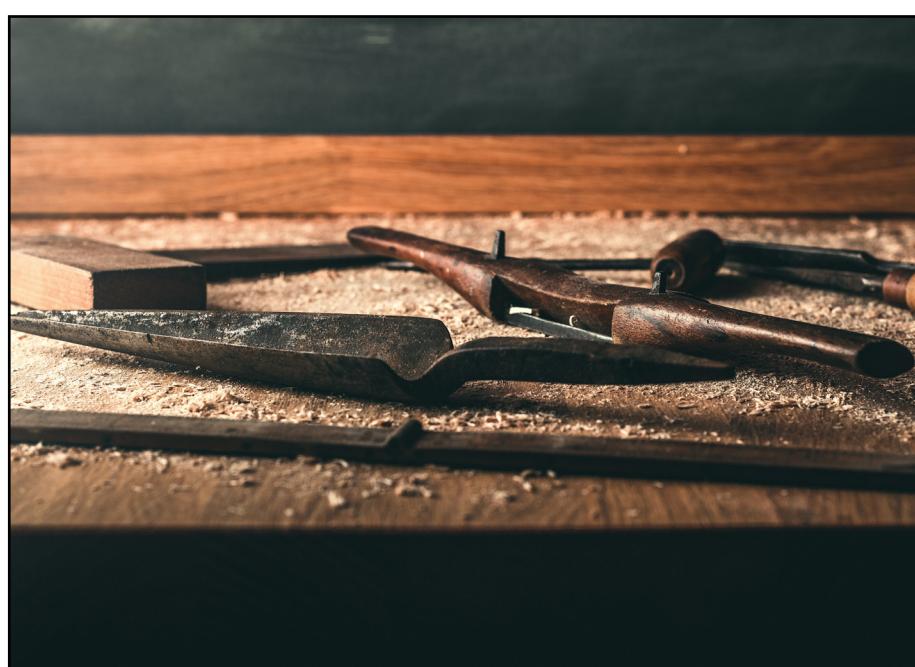

The school missed women of nearby areas to Palur who wish to start and be part of an economically improvised society needs to be trained and so is the need to learn things to train them. Navigation steps towards making this possible is been taken and all set to start with the aim of bringing in work and market to the ones who wish to work for their family and their upbringing.

Programs to be useful requires skill to work and so we are planning to arrange craft teaching sessions to the people of the Palur

and areas where this can be handy and to help. We have marked a few points of programs that would require people with the knowledge to make craft-works to join us.

Our program aims at raising funds via craftworks for teaching money-earnable skills to the people of Palur and other places where people are wishing to be part of a growing and flourishing society. We have plans for outreaching people in remote ares of nearby places to Berhampur.

This way of making people skilled would not only make people grow in their life but also bring development in our society. With hope and zeal to make lifes better, we would make our program a social movement.

THINK PAD

Youths will eventually be the pure-most factor in changing the Indian economy.

-Abhisek Mishra

Environmental issues are a major problem in our world, and all people need to recognize the need for our social obligations.

-Rahul Sharma

To bring down the poverty rate skills training, mandatory education for children, job opportunities, and workshops for self-work is the need of today.

-Sushil Kumar

Working for the good of people who have a life of poverty and despair in the mega-slums, without sufficient drinking water supply, with the garbage disposal areas around, and in many cases without electricity will make our society Swacch in the real sense.

-U Karishma Patro

Nature with elements make a combination of five and break-in severance of five.

-M. Vijay Pillai

Uniform civil code, in its true spirit, must be brought about by borrowing freely from different personal laws; the government should be sensitive and unbiased at each step while dealing with the majority and minority communities. Otherwise, it might turn out to be more disastrous in the form of communal violence.

-Vaibhav Kumar

Present-day developments in the field of knowledge are the ways towards finding life making science and secrets which can solve problems and provide us with alternatives for better living. It can be achieved by learning, sharing experience-based knowledge with documentation.

-Ankit Mishra

Talk to a 3-4-year-old child, chop off his play. With a few books, add the necessary spices of stationery items, arrange them in a school bag, then put the child in a school of your choice. While doing this the child's cheek may be wetted by teardrops, but you need not worry. On the high temperature of tension and high pressure of studies, keep the child in the cooker of board examinations. You may have to repeat the previous step just in case you don't get the desired taste of the result. Knead studies in the child's brain till he/she starts earning money. Now, the intelligent, self-dependent person is ready to be served to his/her bride/bridegroom.

-Rupali Raj

A soldier is an unsung hero who remains in the shadows and plays out a part that is not seen but only felt.

-Deepak Kumar

Drug addiction is not a one-person phenomenon, and it creates a domino effect on the lives of those around them.

It is a social problem that normalizes drug use and affects individuals and their families.

-Tayaba Nikhat

India's future is in smiles of the future generation, let them smile.

-Sai Spurthi Atmakuri

Education is the most important factor in the development of human civilization. Education provides the nation with man powers, promotes national unity and uplifts public awareness.

-Rohit Bharti

The ability to remain consistent with your choices is a proficiency that necessitates a lot of will-power.

-Ayush Kumar
